

# 2018 MURRAY GREY

## SIRE SUMMARY

**INTRODUCTION** – The American Murray Grey Association 2018 Sire Summary has been compiled from the most recent genetic evaluation of Murray Grey cattle around the world. To be included in the AMGA list, a sire must have at least 20% Accuracy in either Weaning Wt or Yearling Weight EPDs, 3 or more progeny under evaluation in 2 of the last 3 years. For inclusion in the published Carcass Traits Evaluation, a sire needed to have data reported in 3 or more categories. Inclusion or exclusion from this list is not a statement on the breeding value of a sire. Positive EPDs are reported with the “+” sign. Top 10 trait leader bulls in each category are shaded blue.

The EPDs for other Murray Greys can be found on the AMGA Pedigree and EPD web site.

Disclaimer: The American Murray Grey Association assumes no liability for typographical errors that may have resulted in formatting the Sire Summary for publication.
